"Revenge of the Electric Car" presents the recent resurgence of electric vehicles as seen through the eyes of four pioneers of the EV revolution. Director Chris Paine ("Who Killed the Electric Car?" 2006) has had unprecedented access to the electric car research and development programs at General Motors, Nissan, and Tesla Motors, while also following Gadget, a part-time electric car converter from Culver City who refuses to wait for the international car makers to create the electric vehicles which the public and the Environment demands.
